

# SR-15ZBS Indoor Siren

## Dual-Purpose Siren That Delivers Double Protection

- Long battery life
- Different alarm sounds for fire and intrusion
- Entry and exit delay beeps

The SR-15ZBS is an indoor siren with battery life of more than two years. With a siren output level of 102dB at 1 meter, this ZigBee siren activates different alarm sounds for fire and intrusion to audibly inform the user of the type of danger at hand. The SR-15ZBS provides programmable alarm duration of 3, 5 or 10 minutes.

This dual-purpose siren also receives signals from the control panel to emit entry and exit delay beeps. If your control panel is distant from the front door and you have difficulty hearing its entry and exit delay beeps, the SR-15ZBS can serve as a useful reminder device. It can be configured to emit entry and exit delay beeps that urge you to disarm your security system or leave quickly.

The SR-15ZBS transmits low battery and supervisory signals to ensure its operation is properly monitored and maintained. Its cover tamper protection prevents unauthorized removal. Compatible with other manufacturers' ZigBee systems and devices, this wireless siren can be flexibly installed on commercial or residential premises to provide effective warnings and reminders for the user.

### Features

- Battery life of more than two years
  - Siren output level is 102dB at 1 meter
  - Different alarm sounds for fire and intrusion
  - Programmable alarm duration of 3/5/10 minutes
  - Receives signals from the control panel to emit entry and exit delay beeps
  - ZigBee Certified product
- Transmits low battery and supervisory signals
  - Cover tamper protection prevents unauthorized removal and vandalism
  - Compatible with other manufacturers' ZigBee systems and devices
  - Compact and sleek design
  - Easy to install
  - Completely wire-free

### Specifications

Power supply	4 alkaline D batteries
Battery life	Up to 5 years
Siren output	102dB at 1 meter
Communications protocol	ZigBee Pro HA 1.2
Frequency	2.4 GHz ISM band
Operating temperature	-10°C to +45°C
Operating humidity	Up to 85% non-condensing
Dimensions	287.6 mm x 113 mm x 56.6 mm

\*Battery life varies by use and configuration.
