

## Fall Sensor series

## Extra Care Against Fatal Falls

Fall Sensor series provides one of the most effective solutions to minimize the potential harm when the elderly fall. Worn by users as neck pendants 24 hours a day, Fall Sensor automatically raises alarm calls to the monitoring center and activates the medical alarm to open two-way voice communication when falls have been detected.

As one of significant causes of morbidity, falls may seriously affect senior people's health. The fall detection reports from Fall Sensor make sure help arrives at the earliest possible time. Users can also press the button on Fall Sensor to summon help when in need.

One of the smallest and most elegantly built of its kind on the market, the Fall Sensor series is designed to be light and comfortable. It contributes to the establishment of a complete telecare supervision network at any home.

### Features

- Activates alarm call when a fall is detected
- IP67 waterproof for use in shower or bath
- Manual activation by pressing button
- Regular supervision signals to check system integrity
- LED indicator
- Worn as a neck pendant
- Battery can be replaced
- Low battery detection
- High stability and sensitivity

### Specifications

#### Fall Sensor-1

Frequency	433 MHz / 868 MHz / 869 MHz
Power Source	CR2477 3V Lithium battery
Battery Life	2 years*
Operating temperature	-10°C to 45°C (14°F to 113°F)
Operating Humidity	Up to 85% non-condensing
Dimensions	59 mm x 42 mm x 19 mm
